P. SIVA PRANESH

Java Backend Developer | Spring Boot | REST APIs | Backend Engineering

Chennai, Tamil Nadu • +91 86678 36737 • praneshsiva8@gmail.com

TECHNICAL SKILLS

Languages
Java, SQL, PHP, JavaScript, HTML5/CSS3

Backend Technologies
Spring Boot, Spring MVC, Spring Security, Hibernate / JPA, RESTful APIs, Servlets & JSP

Databases & Cache
MySQL, Redis, Elasticsearch

Tools & DevOps
Git & GitHub, Postman, IntelliJ IDEA, Docker, Flyway

Core Concepts
OOP, DSA, MVC Architecture, REST API Design, JWT & Role-Based Access Control, Unit Testing (JUnit/Mockito)

SOFT SKILLS

- Agile Collaboration
- Analytical Problem Solving
- Continuous Learning

EDUCATION

B.E. (Computer Science)
Anna University, Dindigul (2020 – 2024)
Score: 70%

Higher Secondary (HSC)
C.M.C. Matric School (2018 – 2020)
Score: 72%

SSLC
C.M.C. Matric School (2018)
Score: 89%

CERTIFICATIONS

- **Java Backend Dev** – Login 360
- **Python Full Stack** – GUVI

LANGUAGES

English (Professional)
Tamil (Native)

PROFESSIONAL SUMMARY

Computer Science & Engineering graduate with a strong foundation in Java backend development using Spring Boot, Spring MVC, Hibernate/JPA, and RESTful API development. Hands-on experience contributing to production-grade web applications during a Laravel internship, gaining practical exposure to MVC architecture, database design, authentication, and collaborative development workflows. Passionate about building secure, scalable backend systems and eager to contribute to enterprise software development while continuously learning modern technologies.

INTERNSHIP EXPERIENCE

Web Development Intern | Skyraan Technologies — Nov 2025 – May 2026

- Contributed to live client projects using Laravel, developing backend features and enhancing user interfaces using MVC architecture, Blade templating, and Eloquent ORM.
- Diagnosed and resolved critical bugs in production applications, enhancing execution speed and system reliability.
- Designed database schemas and executed migrations using MySQL, ensuring data integrity and optimized query layouts.
- Collaborated closely with cross-functional development teams using Git version control for code reviews and incremental feature deployments.

SELECTED PROJECTS

Kapitofin – Enterprise Budget Management Platform

Tech Stack: Java, Spring Boot, React, MySQL, Spring Security, JWT

- Developed a full-stack budget management system with allocation, approval workflows, and utilization reporting.
- Designed a secure 6-level Role-Based Access Control (RBAC) system using Spring Security and JWT authentication.
- Created over 40+ RESTful APIs and implemented business rules for approval routing based on budget thresholds.

ShopEase – Full-Stack Containerized E-Commerce

Tech Stack: Java, Spring Boot, React, MySQL, Redis, Elasticsearch, Docker, JWT

- Built a dockerized e-commerce application with Stripe integration and dynamic inventory tracking.
- Implemented Elasticsearch product search with a JPA criteria query fallback database mechanism.
- Optimized performance using Redis for cart caching and rate limiting, and handled migrations using Flyway.

KEY ACHIEVEMENTS

- Successfully completed a 6-month industry internship working on production client applications.
- Designed and containerized full-stack Java projects integrating Docker, Redis, and Elasticsearch.
